MUNICIPAL HOME REHABILITATION PROGRAMS

By: Lara Beecher, Legislative Fellow

ISSUE
Briefly describe municipal home repair and rehabilitation programs available to Connecticut homeowners.

SUMMARY
There are several different kinds of municipally administered home repair and rehabilitation programs available to homeowners. This report provides examples of programs supported with U.S. Department of Housing and Urban Development (HUD) grants and those supported with municipal funding. HUD supported programs are the most common type found in Connecticut. Eligibility criteria typically follow the HUD income guidelines for low- and moderate-income households.

The state and federal governments also directly administer funding to homeowners, businesses, and nonprofit organizations offering home rehabilitation assistance, but this report does not address those (see below for links to related reports).

Many of Connecticut’s municipalities administer homeowner rehabilitation programs utilizing funding available through the HUD Community Development Block Grant (CDBG) program. CDBG funding is divided between “entitlement” and “non-entitlement” communities. Entitlement communities (i.e., cities with populations of at least 50,000) receive CDBG grants directly from HUD. Non-entitlement communities (i.e., municipalities with populations of less than 50,000) must compete to receive CDBG money through the state’s Small Cities program. The Small Cities grants are administered by the Department of Housing (DOH) and the municipality. The municipalities (1) vet applications from residents for a portion of the funding allotted to the municipality and (2) may designate some funding for a project of the municipality’s choosing.

While it also has HUD funded programs, New Haven is the only example we found of a municipality with its own housing rehabilitation program separate from the CDBG program.
SUMMARY OF MUNICIPALLY-ADMINISTERED PROGRAMS

In Table 1, East Hartford is an example of a CDBG entitlement community and Norwich and Putnam are examples of non-entitlement communities. Newtown is included as an example of a housing rehabilitation program that was originally funded by the CDBG program but now is self-sustaining through repaid loans. Table 2 contains a brief description of the programs available through New Haven.

The information in the following tables reflects the information available via each municipality’s website and hyperlinks to those sites are included in the tables.
