

B"H

Submission in inalterable opposition to the proposed Assisted Suicide bill entitled:

H.B. No. 5417, "AN ACT CONCERNING END-OF-LIFE CARE"

~~~~~W

Esteemed Connecticut Legislators,

The primary role of legitimate Government is to protect the lives of innocent citizens.

Another primary role of Government is to maximize public participation in the process of governance.

This bill clearly violates the former obligation, basic human decency, and, above all, Divine Will.

But here we point out a foundational procedural flaw, indicative of the corruption of the Legislative Process itself.

This bill is titled "AN ACT CONCERNING END-OF-LIFE CARE."

That could easily refer to a bill adjudicating guidelines for providing a bed-pan to a terminally ill citizen.

In reality, this bill would elevate the intentional killing of the terminally ill, under certain broad conditions, from a heinous crime to a government-mandated license to kill (evoking nostalgia from aged perpetrators of the infamous European Experience of decades ago).

By misusing language to conceal - rather than reveal - the truly lethal nature of this bill, those responsible for this deceptive title have violated public trust by contravening both aforementioned obligations.

IF this bill would be properly labeled, hundreds of citizens would rally to voice their opposition.

Since it was intentionally mislabeled, public participation will likely be successfully suppressed manifold.

Also note how notice was posted Friday, just before the weekend, with the deadline for online submission being noon Monday, impeding Sabbath observers from providing a properly prepared response.

Whether or not the broader public will respond accordingly, some sectors clearly will.

All legislators seem to recognize that Elections matter,

even though, for some, lives do not.
