

To whom it may concern,

At age 81, I'm very concerned and hoping that CT. will approve to have doctors assist people with dying. This is an important matter for me. My mother died from Alzheimer's and it would have been so much less painful for her and her family if she had had doctor assistance with her dying. I really hope and pray that the CT. Legislature will create a bill and it will pass so that Compassion and Choices will be available for CT. citizens.
