

March 2, 2020

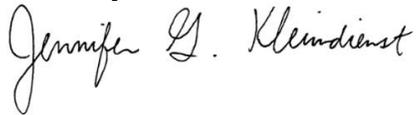

Dear Energy & Technology Committee Members

I am submitting testimony **IN SUPPORT WITH CHANGES** of Governor's Bill 10 to assess the energy, environmental, and air quality impacts of adopting California's medium and heavy-duty vehicle emission standards.

I support the creation of regulations that would adopt these standards if they would reduce Connecticut's greenhouse gas emissions. The targets for reduction should be accelerated, however, based on Intergovernmental Panel on Climate Change research that indicates we as a planet have only ten years to seriously address climate change; Connecticut's target should be moved up from its current 2040 goal.

I urge the committee to **SUPPORT** Governor's Bill 10 with this suggested change to adequately address climate change. Thank you for your consideration as you deliberate on this bill.

Sincerely,

A handwritten signature in cursive script that reads "Jennifer G. Kleindienst".
