

To the Insurance and Real Estate Committee of the CT Legislature,

As a small business owner in Easton Connecticut, I'm writing to support SB 346 that would provide an affordable option for healthcare coverage in CT. I currently use a plan via the ACA program and it's getting increasingly difficult to find suitable/affordable coverage.

My partner is also struggling to find health insurance. He works full time as a manager at a local hardware store and doesn't qualify for insurance through the store.

Please pass this bill allowing CT residents to access plans that would help small businesses owners and residents who live and work in CT.

Thanks,
