

My elderly father in law and my mother need more help and I wanted to work less hours at age 59. My husband owns his own business (one man).

I could not lessen my hours from full time 36 hrs at a small healthcare center without having to pay my full healthcare premium for the 2 of us.

I feel lucky to have found a job in a corporation that allows for a 32 hour work week and full time benefits for the 2 of us. I would work less hours if I did not have to provide health insurance for us both.

Job choice should not be tied to healthcare availability.
