To whom it concerns,

The West Haven Child Development Center (Head Start) is an excellent program for parents and children. It gives the parents the ability to be able to work and the children are able to interact with others and learn lots of things. I've had nothing but good come from the program. My older children went to WHCDC and having that ability made a difference in school. Now that I have younger children, WHCDC was my first choice and I would recommend WHCDC to others. The staff are very educated and well trained to handle almost anything. They have always made me feel comfortable leaving my children. I would like to thank everyone. Thanks Crystal Benoit.
