Re: Environment Committee Testimony, HB 6441 and 3/8

Dear Senator Cohen, Representative Borer, and members of the Environment Committee:

On behalf of the Roxbury Land Trust, I ask that you support HB 6441 which provides municipalities with the ability to fund climate adaptation and resilience projects in line with the recommendations of the Governor's Council on Climate Change.

Special support goes to Section 3 of the bill which provides towns with an option to establish a buyer's conveyance fee to fund land stewardship, climate resilience, and other environmental projects in our community.

Here in Roxbury, these funds can support environmental projects including conservation and land stewardship of ecologically important properties. As we know, adoption of the program is optional and comes at no cost to the state.

Please support HB 6441 and give our community the opportunity to decide whether to establish this important funding program. Thank you for your work on behalf of the people of Connecticut, their environment, and climate resiliency.

Best regards,

Ann Astarita
