

I write in support of HB 6441: An Act Concerning Climate Change Adaptation. As a former councilmember of a small town in Ohio I know the benefits legislation like this brings to municipalities, and I hope to see this bill enacted here in Connecticut.

Like all organizations municipal governments have to constantly juggle desired policy outcomes with what's possible - financially, organizationally, and with regards to available time and resources. Having enabling legislation like section 3 of HB 6441 provides a blueprint, an additional tool to select, instead of having to spend time and effort designing and building the tool in the first place.

Thank you.
