

SUBJECT: Support HB 6441 An Act Concerning Climate Change Adaptation

To whom it may concern,

I support HB 6441 An Act Concerning Climate Change Adaptation that will fund climate adaptation and resilience projects. Sec. 3 of the bill states that there would be a buyers conveyance fee on the conveyance of real property in a municipality. This bill could give towns across our state funds to support local projects such as open space lands, combatting invasive species in lakes, stewardship at urban parks, matching state and federally funded grants, testing for brownfield remediation, and other environmental projects. This bill would be very beneficial and an positive resource to many towns across our state. I am glad I had the opportunity to discuss this legislative matter, I look forward to your response. Please support and pass this bill. Thank you

Sincerely,

Halle L Pierce
