

SUBJECT: Support HB 6551 An Act Concerning Environmental Air Quality

To whom it may concern,

I support HB 6551 An Act Concerning Environmental Air Quality. This bill would ensure that our state receives clean non-polluting energy that protects the public health of our most vulnerable populations as well as lower greenhouse gas emissions. There are low income and underserved communities of color in Connecticut where these communities are environmentally disadvantaged. HB 6551 would prevent further environmental damage to these communities that have lack of good air quality and environmental insufficiencies. In addition, data centers absorb and consume a lot of energy and are energy intrusive. It is imperative that this bill be able to facilitate the energy and emissions as well. I am glad I had the chance to discuss this legislative matter. I look forward to your response. Please support HB 6551. Thank you

Sincerely,

Halle L Pierce
