Explanation

The bill makes changes to laws regarding electronic defense weapons and results in a potential cost for incarceration or probation and a potential revenue gain from fines. On average, the marginal cost to the state for incarcerating an offender for the year is \$2,200¹ while the average marginal cost for supervision in the community is less than \$700² each year.

House "A" changes the effective date of the bill to July 1, 2021 and results in a potential marginal cost for incarceration and probation and

¹ Inmate marginal cost is based on increased consumables (e.g. food, clothing, water, sewage, living supplies, etc.) This does not include a change in staffing costs or utility expenses because these would only be realized if a unit or facility opened.

² Probation marginal cost is based on services provided by private providers and only includes costs that increase with each additional participant. This does not include a cost for additional supervision by a probation officer unless a new offense is anticipated to result in enough additional offenders to require additional probation officers.
