

As a senior with medical problems, it was wonderful to be able to vote by mail in 2020, and avoid the risk of getting COVID to exercise my right to vote. There is no reason voting by mail should not be available to everyone for all elections. It would make voting much easier for people whose jobs make taking time to vote almost impossible, or have other reasons it's hard for them to vote in person. Nobody should need to give up their wages or risk their health to vote!

Vote by mail available to everyone would be a great way to increase the percentage of people who can and will vote. Please support it!
