

I absolutely am not in support of the three bills regarding voting rule changes! If you want to vote bring a license and vote. If your serving our country in the armed service vote by absentee. If you are medically incapable to vote you should be sent an absentee ballot. Blanket absentee voting is a prime target of manipulation. Voting day is and always has been the First week in November. Absolutely NO reason to change that. I am 67 years old and I voted on election day at my designated voting location with no threat to my health.

There is no reason to use Covid as an excuse to change our time honored and proven method to exercise you right to vote as long as you use precautions and common sense.

Using your brains and not fear makes voting a sacred and safe way to make your voice count.

We are counting on you to make our voices heard. Lets not make this another reason for election result nightmares. The country is counting on and expecting a fair, and honest election. If you want to contact me I would be delighted to speak with you about this subject. Thank you.
