

I am vehemently opposed to any legislation and/or change in the Connecticut constitution that will allow total mail-in voting. Voting is the most sacred of privileges for citizens and it must be safeguarded against any chance of fraud. If photo ID is required to get a drivers license, buy alcohol, buy cigarettes, board an airplane, go to the doctor, etc., then it stands that photo ID is needed to vote - IN PERSON. Also, there should be an Election DAY, not election months. If personal circumstances warrant that someone needs an absentee ballot, then he/she can request one from his/her town, after satisfying the signature and identification requirements.

Please do not use Covid as an excuse to totally abandon all election safeguards. That would be reckless and completely unnecessary.

Thank you.
