

I am writing to support the the two resolutions referenced above to allow for no excuse balloting and early voting. Early voting would make it less onerous on our boards of elections to count the ballots for an election while also helping to spread out the timeframe - and consequently the volume of voters at any one time - prior to an election. No excuse balloting also just makes it easier for voters who can't get to the polls - to use the drop boxes for their ballots. Voting should be made as accessible and easy as possible.
