

I'm fundamentally opposed to loosening restrictions on the voting process here in CT. Mail in balloting without signature verification or ID will absolutely degrade trust in our system. I am also firmly convinced that election day should be just that, a single day. NO additional early voting or adjustments to absentee balloting rules are required. CT residents are free to vote their preference and anyone who is interested in doing so should be clear on the process and abide by our statutes.

Thanks and best regards, Phil-
