

Ladies/Gentlemen

I oppose both for very simple and straightforward reasons. Mail in voting as would be allowed by this bill has the potential for fraud with no real safety nets. It is obvious to me that real proof of who you are must be required to exercise one of our most important rights. I have no issue with our current absentee rules but what is being proposed goes way beyond the current law.

As far as early voting goes it is again obvious to me that Election Day is just that and should be strictly observed. The pandemic was not a real reason to change the law and we should go back to the prior law which did not impose any hardships.
