

Time for CT to do everything possible to encourage voter participation and make voting easier. The changes implemented because of the pandemic need to become permanent. What possible arguments are there against this? Oh, I know, the false claims in 2020 about voter fraud. I support HJ58 which would amend the state's constitution and allow no excuse absentee voting and HJ59 which would also amend the constitution to allow early voting. And this should go into effect immediately...not the usual CT approach where we takes years to accomplish what has been approved. Amazingly, quick changes were done for the 2020 primary and election. I'm sure there are some lessons learned and these changes can go into effect immediately.
