

Please Vote no on HJ 58, 59, SB 901 and HB 6464

February 21, 2021

To whom it may concern:

Voting integrity is a critical aspect of our democracy. Voters can not and must not be disenfranchised. All voters must be given an opportunity to vote, but all citizens must feel satisfied that their vote counts and that there's no opportunity for voter fraud. As we emerge from COVID, many voters distrust government. The state must first ensure the integrity of the existing voting list by assuring continued eligibility. Public trust is important and voting methods should not be expanded and changed until existing voting lists are examined and assured.

As the former Chief Elected Official for the town of Farmington, I can tell you that election results often come down to a handful of votes. It's critical that these votes are legitimate and that voter lists are accurate. Thank you for your consideration.

Sincerely,

Jeffrey J. Hogan
