

In many ways Connecticut is an exemplary state: good education, good recreation, strong economic opportunities and committed leaders. However, it would appear that the Puritans are still in charge of the voting process which is outdated, rigid and written in stone. Where voting is concerned, Connecticut is behind so many other states. It's time to catch up now with early voting, and no excuse absentee balloting. We need to encourage voter participation not discourage it!

Time to catch up Connecticut.
