

I am sending this email in opposition to HJ58.

I am not in favor of making it so easy for fraud to happen. A lot can go wrong. This past November dead people were getting ballots. I don't think it's so much to ask for a person to vote on election day. If they need to vote absentee, they can go to Townhall where their signature and identity are verified. I'm afraid that this is going to make it very easy for election fraud to occur. Thank you.
