

Dear members of the GAE committee,

I had never voted absentee prior to the pandemic. I found the process very easy and safe especially for a senior citizen I also support early voting. Most contiguous states offer this option to its citizens. Again it allows for convenience and if November 3rd is going to have a storm etc you can plan your voting accordingly.

The State of CT should be doing as much as possible to promote voting and make the process as convenient as possible for its citizens.

Thank you for your consideration of my concerns.
