

**Voter participation is critical to a strong democracy! Greater access to voting is essential to democracy. *That means we need to make voting easier for all of our citizens! It is more fair and equitable when voters can choose how they vote!* Let's write today to protect the vote for working parents, college students, those who do shift work or work second jobs, first responders, sick or elderly voters, the voter who is homebound or in military service.**

**Due to the pandemic, I voted using an absentee ballot for the first time this year. Everyone should have the option to keep safe while voting.**

**I endorse this message,
