

The following is written testimony in support of HJ58 and HJ59.

Whoever would have known that it would take a crisis—the Covid Pandemic to expand voting rights in order to preserve the power of our voice through our vote! It is clear that we need legislation that includes expanded absentee ballot voting, early voting, AVR, and voting rights for individuals on parole. There is overwhelming demand and support for CT to create a modern, accessible, and streamlined voting process that serves and represents the people of CT. We need legislators who see, acknowledge, and apply the weight of this responsibility toward serving our democracy, the State of CT, and the people. Kindly vote to support this timely and critical legislation this year. Thank you for your consideration.

Respectfully,
Marianne Schorer
