To our elected Officials in CT: Why we oppose Expanded Access to Absentee Ballots and Early Voting.

The ability to vote and have your ballot count is what defines our country. It is the greatest of our rights to determine our elected officials. However, in consideration of so many people in our country challenging this past election and questioning the transparency of the process, this is the wrong time to throw our voting legitimacy into further turmoil. We support greater transparency and oversight and want to know, with assurance, that our next election will be the most valid in our State's history.

We support only individual Voter applications for Absentee Ballots, which will be mailed to them once it is verified that they are a legally-registered voter. We oppose adding Expanded Access to Absentee Ballots and Early Voting. This is the time for all parties to show every voter that there is no fraud in our State elections; not to open the door to more questions and vitriol about the process.

Thank you for your sincere considerations,

Raymond L. Sementini and Catherine A.
