

I have lived in CT for almost my entire adult life. I vote in every election. As you know this year was very scary because of the pandemic. I am 66 and have been very anxious about Covid. I think with or without a pandemic we should be making voting as easy as possible for everyone. One person/one vote is the hallmark of our democracy. Lets get as many people to participate as possible, not make it harder. This year we had no excuse voting and worked well throughout Connecticut. Why would we go back? And early voting has worked really well in lots of other states, helping to avoid long lines on election day. I urge you to raise and support these bills,
