

Nearly 80% of Connecticut voters support early voting. 43 states already allow early in person voting and 6 states allow for all mail elections. Connecticut needs to catch up with the rest of the country and offer the people who live here the option to vote at their convenience instead of having to take time off work, arrange child care, etc.

We did this in the last general election and saw record breaking turnout. There is no reason to go back. Please pass HJ 58 and HJ 59. Thank you.
