

I Kyle Dearborne support the Proposed H.B. No. 5109 AN ACT PROHIBITING GRADUATION FEES AT PUBLIC INSTITUTIONS OF HIGHER EDUCATION. I feel and agree with the Board of Regents that there should not be a graduation fee at public institutions. This act will ensure students like me, for example, who are graduating don't and will not have to suffer this financial fate as well as for future generations to come. No one should or have to worry about after Achieving four years of hard work and success for a college degree to have pay to receive it, not to mention all the student loans we already must pay back. It's important for our voices to be heard, and I feel good that other people support my thoughts and ideas. Also, during COVID we don't know if we will even have in person graduation, so the cost is more absurd since majority it will be mailed to us in our homes to remain socially distant.
