

I oppose this bill SB #6531

Why should our tax paying dollars pay for legal services for someone being evicted? The majority of evictions are based on non payments , these are adults and should be responsible to keep a roof over the head and stop looking for handouts. Owners are mostly small mom and pop, we are usually out 5-10K by the time the eviction is heard, that's money lost not to mention damages to the property which is usually 99% of the time .

How is this fair ?? We have so many good people/ organizations that need this funding not deadbeat tenants looking to get over on hard working people . It's time to grow up and be an adult and be responsible..... You are teaching these people that we'll take care of you no matter who you steal from because this is what they are doing stealing money from owners and tax payers... If you want to pay for these people then pay for the landlords as well what's fair is fair. If you have an LLC you are forced to have a lawyer you cannot do the eviction yourself another problem in the eviction process. Why don't you change that as well while you are at it. Anyone who supports this bill is very discontnted and I hope you don't ever get re-elected...
