

Dear Appropriations Committee Members and Chair Toni Walker,

A year ago I widely published your Committee's commitment to support Music Haven--I publish the largest publications in the music-for-social-change field. The national/international field of music for social change celebrated it. I just learned that you failed to live up to this commitment. "It was a mistake," has been your response? The young people, their families, and the wider Music Haven community don't understand such as blunder, or care about the reason. It is an insult; please redress this mistake immediately. I will be alerting the national and global community of your Committee's insult to the program. I look forward to announcing this correction and the apology you owe our colleagues.

Thank you,  
Eric Booth
