

Good afternoon to the members of the Appropriations Committee,  
I have been a retired teacher in CT for the past 11 years. I taught second and third grades, regular education as well as special education in the Suffield Public Schools for 20 years.  
Both my husband and I participate in the TRB health insurance program and we feel fortunate that we have such good insurance. As we get older, we are hopeful that the insurance decisions will continue to represent our needs.  
To this end, we are asking for your consideration to add two retired teacher representatives to the TRB in order to continue to represent our needs.  
This request is in reference to the March 9, 2021 public hearing.  
Thank you for your consideration in this request.
