I am writing regarding the March 26, 2021 public hearing of Raised SB1080 Addresses revisions to the Teachers' Retirement System. I implore you to add another retired teacher to the Teachers' Retirement Board. We have 38,000 retired teachers who have served students in Connecticut faithfully and well for many, many years. We need more representation on the board that governs our pensions, health care, and other services. This is very important and certainly fair to the participants.

Thank you.
