Refer to [Raised SB1080 Addresses revisions to the Teachers' Retirement System](#). Please tell the Appropriations Committee it's in reference to the [March 26, 2021 public hearing](#).

It is necessary and important the Retired Teacher's have a voice in any and the decision-making processes that impact the quality, financial, and welfare of the CT retired teachers. We are a large group who served and touched the lives of the many families and children at all levels providing high quality education and support services for all.

Additional representation is necessary and needs to be a priority and considered by members of the Appropriations Committee. This is an appeal for equity in the decision making process that impact the retirement of educators who served Connecticut.
