

Re: March 26, 2021 public hearing

In order for the TRB to administer the teacher's retirement program in the best interest of all 38,000 retired teachers in the state, it is imperative that an additional elected retired teacher be on the board who will solely represent retired teachers. The issues that are most impactful to retired teachers involve health insurance and gross inequity of the taxation of teacher pensions. We need a voice to articulate our needs so as to be treated fairly.

Respectfully,
