

Opposition to SB 1024

Linda S Alexander

Windsor CT

The supporters of this bill do not understand and appreciate the needs and desires of all the people.

We are all different and that is reflected in the unique character of CTs many municipalities.

Some people like have close neighbors and shopping nearby while others seek privacy and open space. Excessive building chases away desired wildlife and impacts the environment in many ways.

I live in a town that supports diverse needs and desires; there are a variety of types of housing and prices.

The town supports recreation areas and open space. My neighbors who moved here from the city or other more densely populated areas did so that they could have more space and land for their children to play.

Instead of trying to make every town into a city, more densely populated areas could provide better parks and recreation facilities so that people could have a choice.

In the end only developers and investors benefit from “development and growth” and people lose the chance to live in desirable neighborhoods that reflect their lifestyle choices.

Please don't vote for a bill that would detract from the quality of life for those you say you are trying to protect.
