

SB 1024

Dear Legislatures,

One of the positive developments in Greenwich and a number of towns along the Metro North has been the

development of new businesses and residential properties a short walk from the train stations.

In many places it has raised the prices of those properties, making them more desirable and sustainable.

To add the restrictions suggested in this bill would stop this new development. If we want more beautiful

accessible town centers, this bill will impede the progress.
