

SB1024

To whom it may concern,

I am against legislation that removes local planning and zoning rules at the town level. Those in Hartford are not living in our communities, don't know the issues we may face or what the long range plans of the town are. Local control by those who live in town has been the long standing tradition and has worked well. We also don't need additional costs placed on the towns by Hartford, who collects lots of money but only seems to share it with a few towns/cities.

Please vote no to this power grab.
