

We are quite capable and have more at stake in our towns future than any committee or politician out of our district.

It's concerning that the federal government is cutting away our constitution every few days. Now, instead of the state helping to defend our rights and the principles America was founded on, you join the effort to further take away our ability to run our community, and our lives as we choose.

You are pushing an increasingly unpopular agenda. For the sake of freedom and liberty, stop it!

Robert Caponetti
