

Dear Planning & Development Committee,

I am writing in support of SB 1024. As a 20-year resident of Connecticut, I know that lack of affordable housing and segregated communities are one of our state's biggest failings. Connecticut is one of the most segregated states in the country and it hurts everyone who lives here; it reinforces inequity and bias and weakens our communities and connections with each other by creating homogenous towns. I support SB 1024 because these policies will work to increase affordable housing and desegregation throughout our state.

Thank you for your time and consideration.

Stephanie Carter
