

Concerning Prospect, CT and House bills (HB 6107, HB 6611, HB 6612, HB 6613, SB 1024, SB 1026, SB 1027)

The state should not be mandating zoning in individual towns. This is a clear over reach by the state to control what are rightly town decisions. If this passes what will the state take over next?

Towns must maintain sovereignty apart from the state just as states maintain sovereignty from the federal government.

Over burdening towns with housing projects and apartments will destroy any evidence of a rural landscape. People live in the smaller more rural towns for a good reason. That reason is that there is no to very little evidence of the landscape that marks a city. You cannot tell us what we should or should not build within our own borders .

We already have a high traffic flow on Routes 68 and 69. Our schools are full. Our resources cannot accommodate a major influx of new residents these projects will bring.

Stay out of our towns. We don't want or need the governor telling us how our town should be structured or what we must build.

Frederick Centrella
