

SB 1024

This bill needs to be defeated. When it comes to development, it's local residents—not the state or special interest groups—who know what works best for our communities. Right now we have hundreds of thousands of people, with no vetting or covid tests, pouring over the border. With this bill the federal government can bus hundreds up to Tolland and say they are our responsibility, we have to support them. Not always the best idea. Tolland should decide what resources it has to help and in what ways, not being bullied by the feds for their failed policies.

Mrs. Loray Courchaine, Tolland CT
