Bill#s 1024, 1027, 6107, 661, 6613

No to all of the proposed bills.

These bills are a centralized government power grab. They remove residents from having a say in their own residence. They will devastate property values when a neighborhood of owned single homes transitions into rentals, or when too many structures are stuffed into a lot meant for only 1 home. Traffic, crime, noise, pollution will all increase because too many people living in too few square feet. Current building moguls would have unchecked capacity to build whatever they want and wherever they want. Many towns could lose their small-town feel and appeal when low-income housing floods in.

No to everything proposed. Local zoning is local for a reason and needs to stay that way.
