

SB 1024

I am against the ideas put forth in this bill because I believe that residents & local government in a given municipality know their community best & since they have to live there, they should be able to decide on the best use of housing & development. I live in Plainville which is a very small & already diverse town. I am concerned that this would limit our ability to control the burden to our resources, schools, tax base and traffic problems. There is also very little open space in our town. I am afraid that we would have the will of outsiders forced upon us which might be more than our little town could bear. This is another example of how our freedoms are being whittled away in favor of big government under the guise that they know what is best for all. Sincerely, Gary & Amy Jarboe
