I am a strong supporter of local zoning laws. I am therefore strenuously opposed to the state of Connecticut's proposed plan to usurp and super impose it's authority and enforcement over our existing local zoning regulations.

This proposal adds another unneeded bureaucracy and a top down "one size fits all" mentality set of restrictions that fails to respond and address local situations.

The current state zoning mandates for subsidized restrictions that overrule local zoning laws should be eliminated - not expanded!

Enough is enough.
