Subject:

Bill S B 1024

Local Zoning Legislation

The State should not be involved in the town zoning- this bill is just another way to micro-manage. A way to take the control away from the town where we live.

The individual towns have a zoning board – they are responsible for zoning and serve the people in their town, They know what is needed and take care of such. The wetlands, the drinking water criteria, the open space, and housing needs plus more. Are all discussed and planned by these town people.

Another committee from the state government is a waste of money and will only hinder the towns progress.

Keep the State out of towns!!!
