

To whom it may concern,

I appreciate your brutal disposition and complete willingness to destroy the people's ability to govern their own cities and towns. Your bill is absolutely fanatical in its push to devalue property and bind the hands of the people yet again. As a Stamford native of far too long of a generation I am appalled at the thought of our loss of history and character as we turn every lot into nothing more than tenements that you claim are affordable multi-family housing, as I watch the neighborhoods turn from beautiful single-family homes to multi-family with more vehicles than space in the yard. As we are unable to have a garage of more than two bays? What concern is that of yours? I'm sure you selfish political elites have more than 2 vehicles per household. Your reach for control over our towns is disgusting. You are nothing more than power-hungry federalists seeking to centralize government so you may impose your will on the people and create a state of urban decay and overpopulation while you sit in your high tower driving expensive cars and wearing expensive suits. Maybe if you got to know the people you're supposed to represent and the neighborhoods they live in you wouldn't be so quick to take (what little they have) from the middle class and give it to someone else. Maybe you would do as the founding fathers and let the people self-govern. SB 1024 is as tyrannical as yourselves.

D. Malarkey
