RE:SB_1024 and others

I write today to submit my opposition to enabling any state authorities to interfere with local planning and zoning. I believe affordable housing and equitable land use are best accomplished through local action without interference from state authorities who do not know or understand the character of the land and neighborhoods in question. Only citizens of any neighborhood are qualified to judge proper land use. It is unconscionable to me that any authority would look to undue the look and feel of neighborhoods and towns that they don't live in!

Thank you for your attention!

Regards,

Karen A. Martin
