

To whom it may concern this email is in response to the bills listed below.
My name is Deno Rubera
I live in East Hampton CT

Responding to bills
HB6107, HB6611, HB6612, HB6613, SB1024, SB1026, SB1027

Our cities are places of business and housing and are equipped with the proper school districts, public transportation and infrastructure to handle multiple large housing complexes, many have been remodeled or rebuilt and upgraded. Our towns are diverse from the cities to give the state of Connecticut its beauty and environmental protection. If we make all our towns look like and developed like our cities we will destroy the beauty and environmental diversity of our state. Towns are not equipped for large housing developments in the infrastructure and public water and sewer services. Drive around Connecticut and see the countryside and beauty of our state. Please do not pass these bills and destroy the beauty of our state and destroy our environment. Please keep control with our local town government, and do not make State mandated zoning, please protect our fragile environment.

Thank you
Deno Rubera
