

This is in reference to S.B. 1024.

I strongly urge that bill S.B. 1024 be voted down. Local control is a hallmark of the founding of our state. Assuming that one size fits all in zoning or other requirements doesn't hold true. Towns are at very different stages of development, have different amount of space, different cost factors and have very different needs. Money and efforts should be used to improve the areas that need improved housing and better educational opportunities rather than interfering with other areas. Home rule is important to maintaining the health and development of our state.
